CPL
CHEMISTRY AND PHYSICS OF LIPIDS

Volume contents

Volume 85 (1997)

M. Kveder, G. Pifat, S. Pečar, M. Schara, P. Ramos, H. Esterbauer (Croatia, Slovenia, Austria) *Nitroxide reduction with ascorbic acid in spin labeled human plasma LDL and VLDL* 1
T. Seifert, O. Zschörnig, J. Arnhold, K. Arnold (Germany) *Beta-blockers inhibit the modification of low-density lipoproteins by sodium hypochlorite in vitro* 13
M. Köberl, H.-J. Hinz, G. Rapp (Germany) *Enthalpy is a proper criterion for comparability of monolayer and bilayer studies: isobaric temperature scanning measurements on glycolipid monolayers* 23
H. Tanaka, H. Saito, H. Kawazura (Japan) *Use of VO^{2+} as a spin probe for dynamics of polar headgroups in phosphatidylcholine bilayers* 45
K. Kinoshita, T. Asano, M. Yamazaki (Japan) *Interaction of the surface of biomembrane with solvents: structure of multilamellar vesicles of dipalmitoylphosphatidylcholine in acetone-water mixtures* 53

Short Communications

H. Komatsu, S. Okada (Japan) *Effects of ethanol on permeability of phosphatidylcholine/cholesterol mixed liposomal membranes* 67
D. Danino, A. Kaplun, G. Lindblom, L. Rilfors, G. Orädd, J.B. Hauksson, Y. Talmon (Israel, Sweden) *Cryo-TEM and NMR studies of a micelle-forming phosphoglucolipid from membranes of Acholeplasma laidlawii A and B* 75

D. Schwarz, P. Kisselev, R. Wessel, S. Pisch, U. Bornscheuer, R.D. Schmid (Germany, Belarus) *Possible involvement of nonbilayer lipids in the stimulation of the activity of cytochrome P450SCC (CYP11A1) and its propensity to induce vesicle aggregation* 91
M.S.F. Lie Ken Jie, M. Khysar Pasha, C.K. Lam (Hong Kong) *Ultrasonically stimulated oxidation reactions of 2,5-disubstituted C_{18} furanoid fatty ester* 101
T. Söderlund, J.Y.A. Lehtonen, J.-J. Sievi, P.K.J. Kinnunen (Finland) *Formation of a macroscopic membrane structure by liposomes containing cationic lipids and exposed to DC electric fields* 107
F. Volke, R. Waschipky, A. Pampel, A. Donnerstag, G. Lantzsch, H. Pfeiffer, W. Richter, G. Klose, P. Welzel (Germany) *Characterisation of antibiotic moenomycin A interaction with phospholipid model membranes* 115
D.V. Kuklev, W.W. Christie, T. Durand, J.C. Rossi, J.P. Vidal, S.P. Kasyanov, V.N. Akulin, V.V. Bezuglov (Russia, UK, France) *Synthesis of keto- and hydroxydienoic compounds from linoleic acid* 125
J.-P. Rolland, C. Santaella, B. Monasse, P. Vierling (France) *Miscibility of binary mixtures of highly fluorinated double-chain glycerophosphocholines and 1,2-dipalmitoylphosphatidylcholine (DPPC)* 135
J. Barwicz, P. Tancrède (Canada) *The effect of aggregation state of amphotericin-B on its interactions with cholesterol- or ergosterol-containing phosphatidylcholine monolayers* 145
J.H.P. Tyman, N. Visani (UK) *Synthesis of polyunsaturated constituents of phenolic lipids* 157

Short Communication

J.E.D. Davies, M.S.F. Lie Ken Jie, O. Bakare (UK, Hong Kong) *Raman and infrared spectral studies of selena, sulphinyl, sulphonyl and tellura methyl laurates* 175
